Lectures

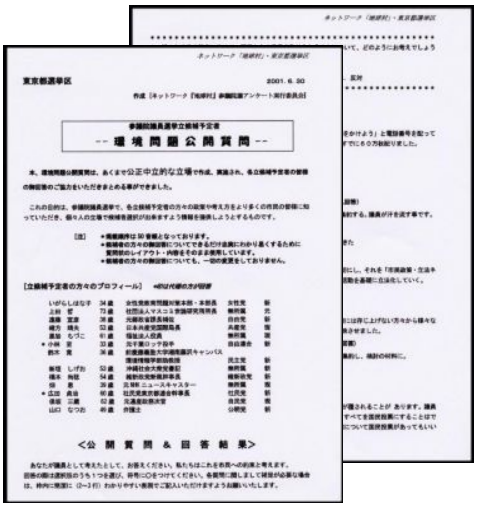
We have organized 3,000 lectures around Japan on the state of the world, its root causes, under the title of "A Beautiful Earth for our Children", "A World of Peace to our Children". As a result, we have currently over 120,000 memberships.

Town Meetings in Local Areas

We hold weekly town meetings at each of 180 local branches, discussing deeply about many issues, and its root-cause with the members.

Humanitarian Support for Afghanistan Refugees

Not only have we urgently supported the Refugee camps with basic needs to survive, but we also assisted reconstruction of the country in the beginning of 2002. We vastly communicate the current state of the refugees, together with the root-cause of starvation and poverty.



Open Questionnaires to Political Candidates

Since spring '01, we are carrying out an open questionnaire to candidates for State Governor elections, House of Councilors election, re-examining public works issues, environmental issues,nuclear energy plans, etc. of each candidates' policies. As a result of opening the answers to the public, we have been successful to increase the number of green conscious politicians in the country.

Stop! Global Warming Campaign

This campaign aims to stop global warming from what each citizens can do at their homes. It aims at reducing CO2 from each households by plotting down energy consumption amount onto an environment housekeeping book. The project team will examine how much reduction was possible in 1 year, nation-wise, utilizing the internet.
